

Envoy Online Application Suite™

Simplified Online Loan and Membership Applications

The ELA™ and EMA™ products from Symitar® are ideal for enhancing the process for in-person applications created by credit union employees. However, in today's mobile world, consumers need to be able to apply for loans and membership whenever and wherever they happen to be at the moment. If that's what your members need, you need Envoy.

Envoy is licensed software that you control, customize, and administer with no per-seat or per-application charges. This means that you're never penalized for your own success in online lending or membership drives. And thanks to Envoy's responsive design, applications render correctly on PCs, as well as all mobile devices.

Features

- No per-seat or per-application fees
- Streamlined self-administration module
- CU-customizable question flow and wording
- Integrated with other CUTEK products (Correio and Prova)
- Can leverage ELA and EMA decision engines
- Customizable interface to match your credit union's branding
- Optional configuration for in-house use
- Responsive page design adapts to any display format
