

## Correio 2.1.13 Update Instructions

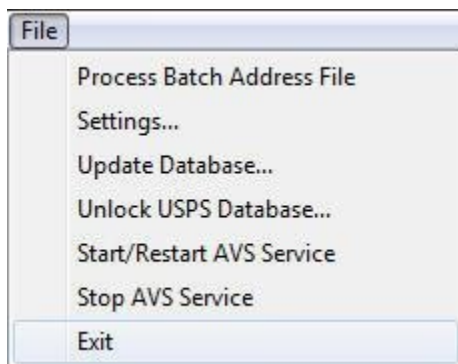

The newest version of Correio is version 2.1.13. If you are running version 2.1.12, you should upgrade immediately. Version 2.1.12 will expire and stop working on July 31, 2019.

All of these steps must be run on the PC or server that is running Correio at your credit union. The Correio service will be down during this update, but the update should only take a minute to perform.

1. Connect to the Correio server.
2. Download the new Correio installer from <http://www.cutek.com/correio-update>
3. Run the Correio program (CorreioShell.exe)
4. Click File and Stop AVS Service

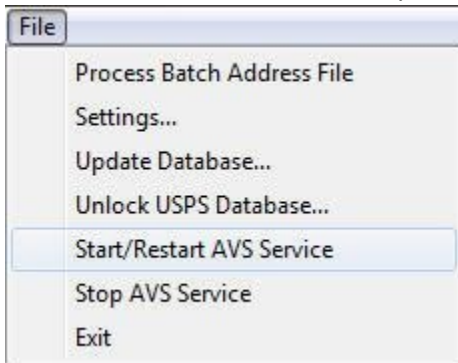

5. Click File and Exit

6. Run the new installer and install to the same folder as your existing Correio install
7. Click OK when the settings dialog appears to keep your current settings
8. Click **Skip** when asked to load the AMS database (your existing USPS database files will be used)

- Correio should reconfigure itself and restart automatically.
- If it does not restart automatically, use the File menu to restart Correio

- Verify the version displayed on the Correio screen is 2.1.13, as shown in the example below. All of the other dates and numbers will vary depending on when you install the update and which USPS AMS database you are currently on.

## ***Correio AVS***

<b>Status:</b>	
<b>AMS Status:</b>	Ready
