

## LEVY MANAGER

Managing government levies and garnishments has typically been a time, labor and paper-intensive task. Depending on volume, this cumbersome process can be a considerable distraction for employees who could otherwise be serving your members. With CUTEK's Levy Manager, this is no longer the case as it allows you to save time with a streamlined HTML interface.

Our Levy Manager solution automates the entire process. When you receive a levy or garnishment request, you simply key in the details and the solution will find any and all matching accounts on your core system. If accounts are found, the solution will identify available funds, excluding protected funds, and will allow you to place holds on those available funds, as needed. Checks can be cut immediately on a case-by-case basis or they can be produced in batch at a later date or time.

### BENEFITS

- Automates the entire Levy and Garnishment Process
- Easy and robust configuration options
- Consistent and Accurate Data Capture
- Speedy and centralized processing
- Simple, intuitive interface

### KEY FEATURES

- Integration with the Jack Henry Symitar® platform
- Centralized or On-Demand Check Printing
- Levy Capture
- Levy Maintenance
- Smart account search and detection of protected funds
- Add/Remove/Modify Process Servers
