- Quick and simple verification
- Launched within Episys Quest™

## Member Verification *Multi-Factor*

Phone number

+1 7137015309

Text  Call

Send verification code

CUTEK's Member Verification Multi-Factor improves member account security by providing a reliable means to confirm the member's identity. This can especially be helpful when members are conducting business remotely, for instance calling into phone centers or other business units. The information presented is updated in real time, which means there's no need to access the host, including transactions.

The integrated system is quick and easy to use and ensures information on file for the member is used to confirm their business with the credit union.

Such a simple, yet effective way, to protect and authenticate our members.
