

WIRE MANAGEMENT

Powered by CUTEK

Key Features

- Streamlined interface with role-based workflows and queues
- Ability to support recurring wires.
- Full transaction handling, including funds availability holds
- Integrated OFAC checking
- Support for international wires
- Include means to draw wire funds from a GL
- Supports Member initiated wires via Single Sign-on from digital banking solution

Benefits

- Speed, quickly create or process wire transfers
- Security, workflow and privilege driven
- Accessibility, easily understood process from start to finish

CUTEK's **Wire Management Solution** is the ideal solution for even the smallest credit unions, up to and including high-volume environments that accept domestic and international wire transfers on a routine basis.

Fully integrated with the Episys Quest platform, the Wire Management Solution makes short work of wire transfers, including forwarding the wire data from the teller to the appropriate manager and on to the accounting department.

CUTEK's Wire Management Solution saves my team valuable time for member repeat wire processing.
