

WIRE MANAGER W/BUILT IN OFAC

Wire Manager makes short work of wire transfers by supporting unlimited custom stages from the teller to the accounting department and offers role-based workflows.

Wire Manager is the ideal solution for credit unions of any size to manage their high-volume, wire transaction environments that accept domestic and international wire transfers on a routine basis. Wire Manager is fully integrated into the Symitar® platform and allows ease of use for both back-end and front-end users with the same flexible workflow at your credit union.

With the higher demand for fast and secure wire transfers, Wire Manager streamlines your internal processes.

KEY FEATURES
